The Nigerian LGA Geodemographic Classification System and Profiler (NIGECS) is Africa's first open-source geodemographic classification system and is a product of advanced and peer-reviewed academic research.

NIGECS was developed by Dr Adegbola A. Ojo.

This profile has been made freely available by the developer of the product. **No payment** should be made for it.

Data Sources

NIGECS was developed from official datasets sourced from the National Bureau of Statistics (NBS). Some data from Macro International and the National Populations Commission were also used to enhance this profile.
